Harvard, University of Rhode Island researchers to study chemical contamination of US waters

By Jennifer McDermott  
ASSOCIATED PRESS  
AUGUST 15, 2017

SOUTH KINGSTOWN, R.I. - University of Rhode Island and Harvard University professors are collaborating through a new research center to study chemicals that have contaminated water at sites nationwide.

The chemicals, called perfluorinated chemicals, have been linked to cancer and other illnesses but aren't regulated in drinking water. Water has been contaminated near sites of industrial facilities and U.S. military bases.

URI announced Tuesday that it received a five-year, \$8 million grant from the National Institute of Environmental Health Sciences to establish a center focused on gaining a better understanding of how these chemicals make their way into water, through the food chain, and affect people and animals.
